10East Corp. is a SaaS and BPO (Software as a Service and Business Process Outsourcing) Provider of Business Management Solutions to the North American Railroad Industry.

Jacksonville, FL - Wednesday, August 23, 2006 - Today 10East Corp. announced that Canadian Pacific Railway (CPR) has selected to pilot the RailDOCS Mobile Business Platform in support of its US properties' federal compliance logistics for the signal department. 10East has also committed to support Transport Canada requirements for future consideration of a RailDOCS system-wide deployment.

"We are excited to be working with CPR. Our proven systems will deliver huge advantages, especially in light of the new U.S. regulations surrounding Configuration Management. Like all of our customers, CPR is extremely dedicated to safety and efficiency, and they understand the value of our service. CPR will also be the first North American Class One to take full advantage of our latest and most robust Personal Mobile Tool to date, the Recon XL, which was just released this month. Now the real work begins with training and getting mobile tools into the hands of the maintenance workers so we can earn our keep," said Mike Wilson, Vice President of 10East Corp.

Lester Hightower, 10East's Chief Technology Officer, said, "Getting our RailDOCS Mobile Business Platform deployed is our short term initiative, but we will also be working closely with CPR to support the new FRA Configuration Management regulations, as well as the expanded requirements of Transport Canada. This will also serve to help our other Class One customers that operate in Canada. We have worked very hard for the opportunity to work for the Canadian-based Class Ones, and now it's up to us to prove the strength of our Mobile Business Platform."

"Our Mobile Business Platform is enabling railroads to accomplish things they simply have not been able to accomplish in the past, while at the same time reducing operating costs. I don't know how it gets any better than that," said Mike Wilson.

10East Corp. is a SaaS/BPO (Software as a Service / Business Process Outsourcing) Provider of Business Management Solutions to the North American Railroad Industry. 10East's flagship service, RailDOCS™ (Railway Daily Operations Control System), has been enabling world class **business management** in the rail sector since 1996. RailDOCS™ provides companies with tools that enable the efficient management of business intelligence, business processes, personnel, projects, and tasks, while lowering capital and operating costs. RailDOCS™ is extensible to the mobile worker through the RailDOCS™ Mobile Business Platform, driving mobile business processes, the collection and dissemination of information, and communication with the front-line mobile employees, while also managing every aspect of the mobile applications, communications, hardware, and users. 10East customers include the rail giants BNSF Railway Company, Canadian Pacific Railway, CSX Transportation, Union Pacific Railroad, and a number of other railroads and rail transport oriented companies.

Canadian Pacific Railway is a transcontinental carrier operating in Canada and the U.S. Its 14,000-mile rail network serves the principal centres of Canada, from Montreal to Vancouver, and the U.S. Northeast and Midwest regions. CPR feeds directly into America's heartland from the

East and West coasts. Alliances with other carriers extend its market reach throughout the U.S. and into Mexico. Canadian Pacific Railway is marking its 125th anniversary in 2006. For more information, visit CPR's website at <http://www.cpr.ca>.
