10East Corp. is a Software as a Service (SaaS) Provider to the North American Railroad Industry with Business Process Outsourcing (BPO) capabilities that compliment its business management technology services.

Jacksonville, FL - Friday, February 20, 2009

Today, 10East Corp. announced that Montana Rail Link, Inc. has chosen to use the RailDOCS™ Preventive Maintenance Management System (PMMS) in support of preventive maintenance and government compliance activities in its signal department. MRL will begin using the Tests and Inspections (T&I) and Configuration Management Systems (CMS) right away, and is considering adding other components in the coming months, such as the RailDOCS™ Plan Management Program (PMP) and the Software Management System (SMS) for Critical Signal Software.

Montana Rail Link joins an expanding list of shortline and regional railroads that are successfully using RailDOCS™ in support of preventive maintenance and government compliance activities. Lester Hightower, VP and CTO of 10East Corp. said, "For the last couple of years, 10East has focused on providing RailDOCS™ services to Class II and Class III railroads and we are very happy to have MRL join our network of customers and partners. I believe that MRL's decision expresses again the success that we are having in providing real value to mid-sized and smaller railroads. MRL's resolve to tackle configuration management, and to do so immediately, illustrates configuration management's importance and value to modern railroad signaling, and it coincides with trends that we are seeing in railroad signaling across North America."

Montana Rail Link, Inc. is a Class II regional railroad with more than 900 miles of track serving 100 stations in the states of Montana, Idaho and Washington, and it employs approximately 1,000 people. MRL operates a fleet of more than 2,100 freight cars and 176 locomotives. Montana Rail Link connects with the Burlington Northern & Santa Fe Railway (BNSF) at Laurel and Garrison, Montana and Spokane, Washington and the Union Pacific Railroad at Sandpoint, Idaho. MRL is one of the independently operated Washington Companies, is headquartered in Missoula, Montana, and is privately held.

10East Corp. is a Software as a Service (SaaS) Provider to the North American Railroad Industry with Business Process Outsourcing (BPO) capabilities that compliment its business management technology services. 10East's flagship service, RailDOCS™ (Railway Daily Operations Control System), has been enabling world class business management in the rail sector since 1996. RailDOCS™ provides companies with tools that enable the efficient management of business intelligence, business processes, personnel, projects, and tasks, while lowering capital and operating costs. RailDOCS™ is extensible to the mobile worker through the RailDOCS™ Mobile Business Platform, driving mobile business processes, the collection and dissemination of information, and communication with the front-line mobile employees, while also managing every aspect of the mobile applications, communications, hardware, and users. 10East customers include the rail giants BNSF Railway, Canadian Pacific Railway, CSX Transportation, Union Pacific Railroad, and a number of other railroads and rail transport oriented companies.
